EXPERIENCE

Alva Labs, Stockholm

JAN 2024 - Present — *Product Design Lead*

Leading the Alva Labs Design team through a high-paced pivotal shift in the product offering into an AI driven product that is the single answer to managing a full hiring process and ensuring great hires.
Currently managing two designers.

JULY 2021 - DEC 2023 — *Senior Product Designer*

Designing features for a recruitment platform to make hiring smooth, unbiased and intuitive.

LogicMonitor, Stockholm — *UX Designer*

JAN 2020 - July 2021 (Acquisition)

UX for integrating logs into a metrics-based monitoring product

Unomaly, Stockholm — *UX Designer*

NOV 2017 - JAN 2020

Feature design in an algorithmic anomaly detection product

Rezonant Designs, Bangalore, India — *UX and UI Designer*

NOV 2014 - JUL 2015

Worked primarily on the design of an ecommerce platform and the user experience of an internal corporate communication platform.

EDUCATION

Hyper Island, Stockholm — *Digital Data Strategy*

AUG 2015 - DEC 2016

Learning to use data and data analytic tools to enable business development, ROI optimisation and better User Experience Design.

MAEER's MIT Institute of Design, Pune — *Graphic Design*

AUG 2008 - APR 2013

SUMMARY

With more than a decade of experience in Design, I started out in India and have been working in Sweden for close to 9 years.

A product designers' job is to be the voice of the user in decision-making spaces and among stakeholders, even when the conversation is tough. As Design lead, I must balance the users needs with the business requirements and make sure that we as a design team are delivering the best solution, grounded in evidence, and maintaining high quality.

I report to the CPO and work closely with a variety of stakeholders, including CTO, Engineering Leads and the PMs.

Currently, I am working 50% as an IC, and delivering design projects to the squad that focuses on assessment quality.

AI is now an integrated part of the design process and toolbox as it increases efficiency in many parts of the process. This leaves a greater importance on the design craft, core problem definition, and understanding the humans that we design for.
