EXPERIENCE

Alva Labs, Stockholm
Jan 2024 – present

Product Design Lead

Leading the design team through Alva's shift into an AI-driven, end-to-end hiring system. Managing two designers and reporting to the CPO.

- Led design for the launch of the end-to-end hiring system in April 2026, including a navigation redesign across the platform.
- Led design for the Alva hiring agent, released in September 2026, including the agent chat and the Action hub.
- Work half my time as an individual contributor, delivering design for the squad focused on assessment quality.

Alva Labs, Stockholm
Jul 2021 – Dec 2023

Senior Product Designer

Designed features for a recruitment platform, making hiring smooth, unbiased and intuitive.

LogicMonitor, Stockholm
Jan 2020 – Jul 2021

UX Designer

Brought logs into a metrics-based monitoring product after LogicMonitor acquired Unomaly, working in a distributed UX team with a large design system.

Unomaly, Stockholm
Nov 2017 – Jan 2020

UX Designer

First designer at an algorithmic anomaly detection product. Set up the team's design process, ran user research and designed features from whiteboard to polished UI.

Rezonant Designs, Bangalore, India
Nov 2014 – Jul 2015

UX and UI Designer

Designed an e-commerce platform and the user experience of an internal corporate communication platform.

EDUCATION

Hyper Island, Stockholm
Aug 2015 – Dec 2016

Digital Data Strategy

Using data and analytics tools to drive business development, ROI optimisation and better user experience design.

MAEER's MIT Institute of Design, Pune
Aug 2008 – Apr 2013

Graphic Design

SUMMARY

More than ten years of design experience. I started out in India and have worked in Sweden for close to nine years.

I see the designer's job as being the voice of the user in decision-making spaces, even when the conversation is tough. As a design lead, I balance user needs with business requirements and make sure the team delivers solutions grounded in evidence and of high quality.

I work closely with the CPO, CTO, engineering leads and product managers.

AI is an integrated part of my design process. It makes many steps faster, which puts more weight on craft, problem definition and understanding the people we design for.
